Mobile Warehouse Data Collection

Improve warehouse accuracy and boost efficiency with mobile device and barcode integration.

Inventory and warehouse managers often find themselves battling inefficient operations due to inaccurate warehouse transactions and time-consuming manual tracking. With Warehouse Insight, this is now a thing of the past.

Warehouse Insight is an add-on for Microsoft Dynamics 365 Business Central and Dynamics NAV that provides warehouse and production employees with full access to Dynamics 365 Business Central via barcode scanners and hand-held computers. Warehouse Insight streamlines Dynamics 365 Business Central's inventory and warehouse functionality to provide intuitive warehousing tools for inventory counts, shipping, receiving, picks, putaways, bin management, and more.

- Get real-time access to Business Central warehouse, inventory, and production data on the shop floor
- Perform all inventory and warehouse operations from hand-held devices
- Use the same device for any location configuration, including non-mandatory bins and directed pick
- Capture lot and serial numbers for any transaction
- Scan directly to sales and production documents
- Use License Plating to streamline warehouse operations
- Customize screens, workflows, menus, and even create completely new applications

We are the Barcoding Experts

Simple Item & Bin Inquiry
Instantly view detailed information like location and quantity about a specific warehouse item or bin.

Inventory Counts Made Simple
Both Standard and Advanced count modules are available to simplify inventory counts through scanning.

Easy Receiving and Put-Aways
The receiving feature enables users to receive against warehouse receipts or source documents like purchase orders and transfers. Cross-docking alerts are generated on the handheld.

Streamline Order Fulfillment
With the pick function, warehouse workers can pick directly to a sales order or pick document. Users can pick directly to license plates or totes.

Movements Made Easy
The move feature handles both ad-hoc and planned movements. Moving items between bins is easy and can all be done from the handheld device.

Built-in App Designer
If you have special requirements, you'll appreciate the built-in application builder that enables non-technical users to simply drag-and-drop logic to add workflows and functionality.
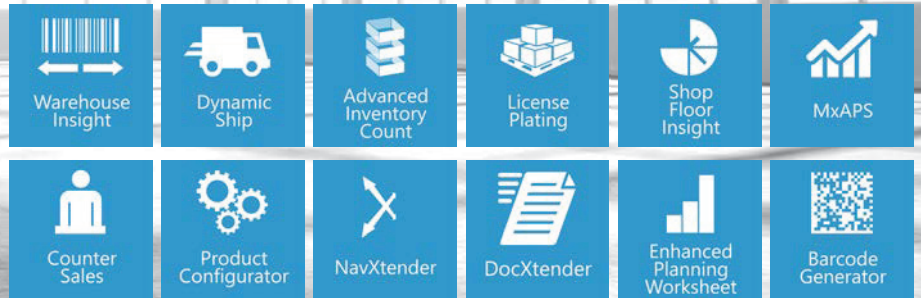

Support for Multiple Barcode Formats
Warehouse Insight will easily read all data from any barcode format, including item, cross-reference, lot/serial number, unit of measure, quantity, and more.

Support for Most Devices
Warehouse Insight supports nearly any make or model of scanner including tablets, mobile computers, barcode scanners and more.

End-to-end solutions for manufacturing & distribution

Warehouse Insight · Dynamic Ship · Advanced Inventory Count · License Plating · Shop Floor Insight · MxAPS

Counter Sales · Product Configurator · NavXtender · DocXtender · Enhanced Planning Worksheet · Barcode Generator
